Inteset Offers Blu-ray HD-DVD Combo Option On Its Servers

Hanover MA, July 26, 2007, Inteset, LLC is now offering an optional Blu-ray HD-DVD combo drive in its Maximus and Denzel media server systems. As a unique offering, Inteset servers can play back both Blu-ray and HD-DVD discs in full 1080p resolution from a single drive.

“It’s been a long time coming,” says David Hirsh, Inteset’s Director of Business Development. “Users now have no limitations for movie playback. DVDs, Blu-ray, HD-DVD, it doesn’t matter, our media servers handle all of these formats”, continues Hirsh.

Blu-ray and HD-DVD playback is facilitated through CyberLink’s PowerDVD Ultra software. All high definition 7.1 surround sound formats are supported without the need of a separate receiver or pre-processor, including Dolby Digital Plus, Dolby TrueHD, and DTS audio.

For more information, visit <http://www.inteset.com>. Inteset products will be on display during the September 07’ CEDIA show in Denver, CO in Booth #326.

About Inteset

Inteset, LLC has been creating high-end home entertainment products since 2003. Inteset offers three categories of products based on the Windows Media Center platform: media servers, media extenders, and exclusive software for its systems. The near silent media servers come with up to 6TB of internal, protected storage with the ability to expand externally. The advanced media extenders are independent systems as well as A/V distribution clients. All systems are shipped with an enriched Windows Media Center interface that includes a movie management module and a multi-zone music module among other exclusive software offerings. These systems appeal to A/V dealers and integrators for their high-integrity construction, reliability, ease-of-use, unique entertainment modules and services, price point, and interoperability with advanced control systems.
