## **Inteset Introduces Powerful Entry Level Media Center**

**Hanover, MA – May 22, 2007** – Inteset, makers of advanced entertainment systems, is now offering a souped-up Media Center at an entry level price. Wrapped in the same small, quiet, and unobtrusive form factor of the Inteset Vana Media extender, the Vana VA6420-Sx Standalone system comes with up to 500GB of storage, a second audio zone for multi-zone music, DVD movie management, and advanced control capabilities.

“It’s the perfect solution for the Media Center newcomer,” explains David Hirsh, in charge of Inteset Business Development. “Inteset offers products that can grow with the customer needs and budget. Dealers that introduce their customers to Windows Media Center can start out with the Vana Standalone model. If the customer wants whole-home audio, it’s there. If they later want advanced, bi-directional control, it’s there. Down the road, they can easily upgrade to a full-fledged Inteset server and use the Vana as an A/V extender. We see this system having a large appeal to the multi-dwelling market,” Hirsh continues.

The Vana VA6420-Sx Standalone system is Exceptional Innovation Life|ware certified and can be also controlled by Crestron, and AMX advanced control systems. Contact Inteset for pricing and available options.

### ***About Inteset***

*Inteset, LLC has been creating high-end home entertainment products since 2003. Inteset offers three categories of products based on the Windows Media Center platform: media servers, media extenders, and exclusive software for its systems. The near silent media servers come with up to 6TB of internal, protected storage with the ability to expand externally. The advanced media extenders are independent systems as well as A/V distribution clients. All systems are shipped with an enriched MCE interface that includes a movie management module and a multi-*

*zone music module among other exclusive software offerings. These systems appeal to A/V dealers and integrators for their high-integrity construction, reliability, ease-of-use, unique entertainment modules and services, price point, and interoperability with advanced control systems.*
