Inteset Advanced Home Theater Systems are Life|ware Ready

Hanover, MA – October 18, 2006 – Inteset LLC, makers of advanced home entertainment systems, announces its partnership with Exceptional Innovation (EI), producers of Life|ware™ home control software.

Inteset systems combine quality-built hardware with unique software enhancements to the Windows Media Center (MCE) platform. Life|ware is a software program that works with MCE to provide one-touch control of climate, lighting, security and more in the home. After undergoing a formal qualification process that included stringent testing, Inteset has achieved Life|ware Ready™ certification. Once installed on a high-end Inteset media server system, Life|ware software will seamlessly run on the MCE interface, providing dealers with numerous whole house control options.

“Several of our dealers have been installing Life|ware on their Denzel systems for quite some time,” said David Hirsh, Inteset’s VP of Business Development. *“This certification will encourage other Life|ware certified dealers to incorporate Inteset systems into more projects and take advantage of this great combination of software and hardware.”*

“We’re really excited that Inteset wanted to participate in our Life|ware Ready program. Quality media centers truly complement the performance capability and robustness of our

Life|ware software,” said Mike Seamons, vice president of marketing for Exceptional Innovation. “Together they offer installers a home automation platform that marries the digital entertainment functionality of a Media Center with the whole-house control that simplifies the home environment.”

Inteset's new 3TB Maximus and award-winning Denzel media servers are optimized for managing the kinds of sophisticated software solutions offered by Exceptional Innovation. These powerful servers are specifically designed to handle extreme processing procedures without heating up or slowing other functions, making them ideal for integration with Life|ware software.

About Inteset

Inteset, LLC has been creating high-end home entertainment products since 2003. Inteset offers three categories of products based on the Windows Media Center platform: media servers, media extenders, and exclusive software for its systems. The powerful Maximus and Denzel media servers come standard with 3TB and 1.2TB of expandable, protected storage respectively. The advanced media extenders, Vana and Julia, are independent systems as well as A/V distribution clients. All four systems are shipped with an enriched MCE interface that includes a movie management module and a multi-zone music module among other exclusive software offerings. These systems appeal to A/V dealers and integrators for their high-integrity construction, reliability, ease-of-use, unique entertainment modules and services, price point, and interoperability with advanced control systems.

About Exceptional Innovation

Based in the Westerville suburb of Columbus, Ohio, Exceptional Innovation produces Life|ware™, home control software for lighting, thermostats, security systems, cameras and media management systems. Exceptional Innovation’s line of elegant, all-digital, high-definition touch panels and robust system controllers round out a complete Life|ware solution. Led by software industry professionals with extensive experience with distributed computing based on open standards and open architecture, Exceptional Innovation combines Microsoft development expertise with years of home control experience to deliver simple, seamless, life-enhancing solutions for the digital home.
