Inteset to Unveil Three New Products at CEDIA

August 25, 2006 - Hanover MA – Inteset, makers of advanced MCE home entertainment systems, announces new systems debuting at the CEDIA show in Denver this September. In addition to demonstrating their industry award winning Denzel media server and Vana media extender systems, Inteset will unveil the Maximus media server, with its TeraRAID IV-NAS storage system, and the Julia all-in-one touch screen extender.

The Maximus TCD00-Si is the ultimate progression from the Denzel media server. This precision machined aluminum alloy heat-sink chassis and internal heat-pipe technology provides unparalleled style, quality, and silence to the system. In addition, the redundant operating system, Intel Core 2 Duo processor, 4 audio zones, DD-EX/DTS-ES, THX certified 7.1 surround processing, and up to 3TB of RAID 5 protected storage make this powerful system one-of-a-kind. The server is built ready for Microsoft Vista, HD-DVD, and Cable-Card.

The TeraRAID IV-NAS storage system displays the same quality and styling as the Maximus server. Although included with the Maximus, it can also be purchased separately. This noiseless, RAID 5, gigabyte network attached storage system is managed by a user-friendly Web browser.

The elegant Julia KPM10-Ax is a 17" 16x9 all-in-one touch screen extender system capable of playing back all media stored on the Maximus or Denzel media server. Equipped with its own CD/DVD drive and FM/TV tuners, it can also function independent from the server. This system is perfect for use in kitchens, bars, and other rooms where space is limited and touch screen use is optimal.

Inteset, LLC has been creating high-end home entertainment products since 2003. All Inteset systems are shipped with an enriched MCE interface that includes a movie management module and a multi-zone music module among other exclusive software offerings. These systems appeal to A/V dealers and integrators for reliability, ease-of-

use, unique entertainment modules and services, price point, and interoperability with advanced control systems.

Inteset products will be on display during the CEDIA in Booth #663 (also see Inteset products in Intel's booth # 419 and Vantage's booth # 135). Visit www.inteset.com for more information.
