Inteset Continues to Innovate with New Party Mode Feature

February 2, 2006 – Hanover, MA -- Inteset, makers of advanced home entertainment systems with Windows Media Center Edition 2005 (MCE), improves on its Multi-zone Music module with Party Mode. As an already exclusive feature of Inteset's MCE systems, the Denzel TP420-SD media server has 3 independent audio zones. Party Mode allows any audio content played in the Master zone (i.e. FM radio, TV, movies, music, etc.) to be played throughout the home via the 2nd audio zone. Party Mode can be turned on or off with the Denzel home theater media server, an Inteset VANA extender system, or any advanced control system such as a Crestron panel.

"Users can now listen to that football game or movie throughout the house so they don't miss a beat," says Jeff Lloyd, Inteset CEO.

The Party Mode feature is available for free on all new Denzel TP420-SD. Owners of previously purchased Denzel systems can contact their local dealer for an upgrade.

To learn more, visit Inteset in booth #726 at EHX this March, go to www.inteset.com, or contact your local Inteset dealer.
