Inteset Media Servers Compatible with D-Box Motion Simulators

Hanover, MA, October 30, 2006 – Inteset, LLC, developers of advanced home entertainment systems, has teamed up with D-Box Technologies, Inc. to offer another exciting entertainment module to its customers.

Technologies by D-Box allow their Quest chairs Universal Motion Platform and Custom Motion Platform seating solutions to synchronize the movement of seating to the music and action on the screen. With a D-Box server controller, either of Inteset's advanced media servers, Maximus or Denzel, will store and process the hundreds of motion-encoded movies and television series.

“Inteset products are great servers for our integrated motion system due to their built-in pre processing capabilities and large hard drive storage capacity,” says Michel Paquette of D-Box Technologies. “Our controller will work directly with Inteset's hard-drive based movie players which will provide an enormous convenience to our audience.”

“As a company who continually strives to offer unique entertainment options to our customers, we are thrilled to include the D-Box experience in our host of offerings,” says Jeff Lloyd, Inteset's president.

About D-BOX

Based in Longueuil, Québec, D-BOX Technologies designs and manufactures high technology motion actuators destined mainly for the entertainment industry. Its unique, patented technology uses motion codes specifically programmed for each film or video game, resulting in motion perfectly synchronized with on-screen action. D-BOX is aiming to become the global standard in the entertainment world. Visit www.d-box.com.

About Inteset, LLC

Inteset, LLC has been creating high-end home entertainment products since 2003. Inteset offers three categories of products based on the Windows Media Center platform: media servers, media extenders, and exclusive software for its systems. The powerful *Maximus*

and *Denzel* media servers come standard with 3TB and 1.2TB of expandable, protected storage respectively. The advanced media extenders, *Vana* and *Julia*, are independent systems as well as A/V distribution clients. All four systems are shipped with an enriched MCE interface that includes a movie management module and a multi-zone music module among other exclusive software offerings. These systems appeal to A/V dealers and integrators for their high-integrity construction, reliability, ease-of-use, unique entertainment modules and services, price point, and interoperability with advanced control systems.

To learn more, visit www.inteset.com. Inteset products will be on display in Demo Alley 102C during the EXH show and in the showrooms of dealers nationwide.
