Inteset Serves Quad CableCARD Quad-Core Systems for the MCX Platform

Hanover MA, November 20, 2007, Inteset, LLC has announced that its Denzel DTCD30-Si media server now supports four (4) internal CableCARD tuners. In addition, units sold with this configuration contain an Intel® Quad-Core processor needed to support simultaneous usage of the tuners.

The server can now record up to four high-definition premium cable broadcasts at once. In addition, the new unit responds to the needs of Inteset dealers that have requested interoperability with the HDMI, 1080p capable XBox 360 as well as the new 2nd generation Media Center Extender units (MCX) coming on the market this holiday season which include those by Linksys and D-Link. Up to five (5) additional MCX zones can be added. Four of those zones can access Live TV simultaneously. Protected recordings are stored on the server and can be streamed to any MCX box on the network. Furthermore, Inteset has enhanced its multi-zone music entertainment module to work with the MCX units generating more value add.

“We’ve given our dealers the flexibility they’ve been looking for,” says David Hirsh, Director of Inteset Business Development. “Dealers can now offer the low cost but powerful MCX platform to their customers to distribute media, including protected premium HD cable content around the house. Individuals can continue to use Inteset’s Vana media extender to stream DVD movies and watch live or recorded premium cable content locally,” continues Hirsh.

About Inteset

Inteset, LLC has been creating high-end home entertainment products since 2003. Inteset offers three categories of products based on the Windows Media Center platform: media servers, media extenders, and exclusive software for its systems. The near silent media servers come with up to 8TB of internal, protected storage with the ability to expand externally. The advanced media extenders are independent systems as well as A/V distribution clients. All systems are shipped with an enriched Windows Media Center interface that includes a movie management module and a multi-zone music module among other exclusive software offerings. These systems appeal to A/V dealers and integrators for their high-integrity construction, reliability, ease-of-use, unique

entertainment modules and services, price point, and interoperability with advanced control systems.
